

In the Description:

Page 1, first paragraph, change "The ... wells." to

-- The present invention relates to a test plug for use in wells, such as oil and gas wells and water wells.--

Page 4, lines 20 to 23, change "The ... claims." to

-- The plug construction according to the invention includes a pipe section having a chamber with an annular seat at a bottom, a plug installed in the chamber with an underside of the plug resting on the seat and sealing bodies between the plug and the pipe section to seal off any passage of fluid between the plug and the pipe section.

In accordance with the invention, the plug is formed of a plurality of disc-shaped glass elements in stacked relation to each other and a plurality of layers of a material other than glass disposed between the glass elements.

In another embodiment, the glass elements are glued together without any intervening layers of other materials.--

Page 4, lines 24 to 25 counsel "The ... 24-26." An insert -- the invention also provides a pipe section that is comprised of an enlarged section to define a chamber with an annular seat at the bottom of the chamber for receiving a plug and an annular shoulder below the enlarged section for receiving an annular device thereon after removal of a plug from on the annular seat.--
